

Practical Solutions in Noise and Vibration

Since our formation in 2002, RBA Acoustics have become one of the largest independent acoustic consultancies in the UK. During this time we have developed a reputation amongst our ever expanding client base for providing noise, acoustic and vibration advice that is practical, reliable and cost effective.

The quality of the service we provide to our clients is extremely important to us. That's why we are committed to keeping up to date with the latest developments in acoustic technology and adopt an ongoing learning environment for our consultants.

Our involvement on 1000's of past projects has allowed us to create a large database of key acoustic performance levels and form excellent relationships with both suppliers and local authorities. This enables us to understand how specific proposals will perform in practice and allows the easy negotiation of particular issues with key decision makers guaranteeing confident guidance in the shortest possible timescale.

Not only do we ensure costs are kept low by using time productively, we also outline exactly what services are required at the beginning of a project to avoid unexpected costs at a later stage. With all this in mind, our clients can therefore be assured that our input to a project is accurate and right first time.

Our Services

The RBA team comprises of consultants with significant expertise in all aspects of acoustics noise and vibration control. This allows us to specifically tailor project teams to suit the key elements that we expect to encounter.

- Architectural Acoustics
- Vibration Assessment
- Environmental Noise Surveying
- Noise at Work
- Licensing
- Sound Insulation Testing
- Construction Noise and Vibration
- Environmental Impact Assessment
- Building Services Noise

We are active member of the ANC, with representation at Board Level. All our engineers are registered testers under the ANC Sound Insulation Registration Scheme

We are sponsor members of the Institute of Acoustics

We are a member of the British Council of School Environments, reflecting the extensive experience we have in the design of educational buildings

A number of our consultants were selected to be Inspectors for Robust Details. Only 30 such appointments are made nationally.
